Specifications for 3" Aluminum Patriot Standards

Model:

3" Aluminum Patriot Standards

Description:

The Lower Section shall be made from extruded aluminum with a 3" outside diameter and a 2.25" inter diameter. The upper section shall be made from extruded aluminum with a 2.20" Outside diameter and a 1.48" inside diameter. The upper section shall telescope to adjust the height of the net. To set the height for the net there will be a steel hitch pin to hold the net height. At the top of the upper section there will be a fixed aluminum pulley to direct the net line. The bottom of the lower section shall have a non-marking rubber plus to protect the gym floor. The crank shall be fixed on the lower section. The crank housing shall be made from 304 stainless steel. The bronze and stainless gears shall be self-lubricating.

Standards and Worm Gear Winch carry a limited lifetime warranty.
