### **Specifications for 3" Patriot Carbon Fiber Pole and Worm-Gear Winch**

#### **Model:**

#### **3" Patriot Carbon Fiber Pole**

#### **Description:**

Base section of pole shall be constructed from high strength braided Carbon fiber. The base pole shall have a 3" outside diameter with a 2.25 inside diameter. The high strength braided carbon fiber base pole shall have a 33" reinforced carbon fiber section. The upper section shall be constructed from high strength braided carbon fiber with a 2.23 outside diameter and a 1.5" inside diameter. The upper section shall have 14 pins locations for height adjustments. Height setting include men's, women's and juniors. The top pulley shall be constructed from solid aluminum. Top and bottom section shall be sanded and painted for a smoother finish. The poles measure 82" in their stored position. System meets or exceeds NCAA, NFHA and USAV Specifications.

Manufactured by United Volleyball Supply, LLC. Made in the U.S.A.

#### **Model:**

#### **Worm-Gear Winch**

#### **Description:**

Worm-gear winch housing is constructed from stainless steel. Gears shall be constructed from stainless steel and bronze. Gears shall be covers and greased inside the housing for consistent tension up and down. Winch handles shall be constructed from stainless steel and shall nest on the winch when not in use. Winch has a lifetime warranty.
